

PREIS Discus Minerals

PREIS Discus Minerals is a combination of minerals and trace elements from purest salts. The product was specifically developed for the special needs of discus fish.

Use PREIS Discus Minerals for your discus fish and benefit from its numerous advantages:

- Enhances the readiness to breed.
- Prevents fungus infections of eggs and skin.
- Enhances the growth of young fish.
- Prevents enppling of gills, tail and fins.
- Contains only pure minerals that your fish need to thrive.
- Easily soluble product which turns osmosis water and soft tap water into high-quality aquarium water.

PREIS Discus Minerals is also perfect for water treatment for viviparous species and Malawi and Tanganyika cichlids. The product is free of sodium chloride, thus avoiding uncontrolled increase of conductivity.

Viviparous species tend to develop fungus infections and other diseases when the water is too soft. PREIS Discus Minerals helps you create a healthy environment for these species.

Dosage

Discus fish:

Osmosis water

15 mL of product per 100 L of water.

Soft tap water (up to 5° dH)

10 mL of product per 100 L of water.

Medium hard tap water (6-10° dH)

5 mL of product per 100 L of water.

For viviparous species:

Increase dosage by 10 mL.

For Malawi and Tanganyika cichlids:

Depending on water hardness, add up to 150 mL of dissolved product per 100 L of aquarium water.
